

# How To Set Up Email Accounts On An iPhone

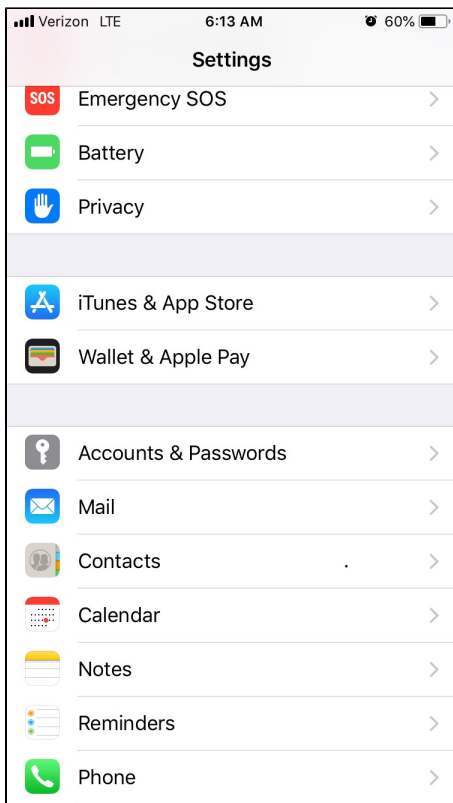

This article will detail how to use the e-mail accounts that you have set up within the UK2 Dashboard account on your iPhone or iPad. This document uses screenshots of setting up an account using the iPhone 7 with iOS 10.3.2.

First, verify the login details are correct by logging in at [mail.uk2.net](http://mail.uk2.net). The username is your email address. If the password you enter does not work, you will likely need to [reset it](#). Once you are able to log in through your browser, follow the steps below to set up your email on your iPhone/iPad.

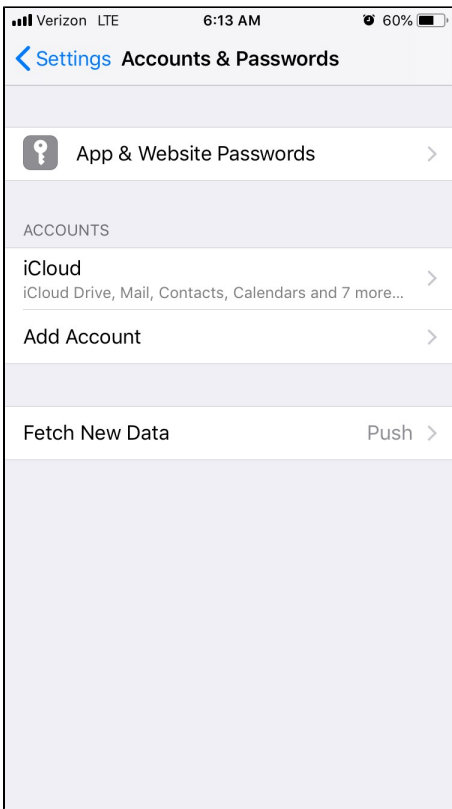

**\*\*All pictures are for reference only. The actual layout of your interface may differ from the images below\*\***

- **STEP 1:** Open "Settings" and select "Mail"
- **STEP 2:** Click on "Accounts"
- **STEP 3:** Click on "Add Account"
- **STEP 4:** Click on "Other"
- **STEP 5:** Click on "Add Mail Account"
- **STEP 5:** Click on "Add Mail Account"
- **STEP 7:** Account Type preference: POP/IMAP (if you don't know, select IMAP). Input the server settings.
- **Step 8:** Click "Next" & save
