

How To Set Up POP Email Accounts In Outlook 2003

This article will assist you in setting up your email accounts that you have set up within the UK2 Dashboard account on your PC. This document uses screenshots of setting up an account using Outlook 2003.

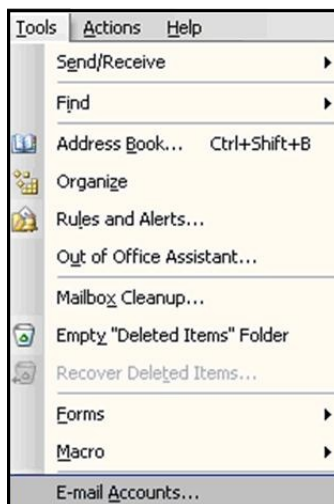

First, verify the login details are correct by logging in at mail.uk2.net. The username is your email address. If the password you enter does not work, you will likely need to reset it. Once you are able to log in through your browser, follow the steps below to set up your email in Outlook 2003.

All pictures are for reference only. The actual layout of your interface may differ from the images below
