

Inventory And Stock Tracking

Keep track of your stock and optionally receive an alert when stock levels are low

On any product page:

1. Click the Inventory tab
2. Select Track inventory for this product

The screenshot shows the 'INVENTORY' tab for 'The Spring - Vintage bike'. It features three main sections: 'Inventory', 'Available stock', and 'Allow purchase when stock level is zero'. The 'Inventory' section has a dropdown menu for 'Track inventory for this product' set to '0' and a text input for 'Notify me when stock level reaches' also set to '0'. The 'Available stock' section has a text input set to '0'. The 'Allow purchase when stock level is zero' section has a toggle switch that is currently turned off.

Inventory tracking

Inventory Settings

1. Set the available stock level for your product
2. Set a stock level you wish to be notified of
3. Toggle to allow purchases when the stock level is zero

This screenshot is identical to the previous one but includes red numbered annotations: a '1' next to the 'Available stock' input field, a '2' next to the 'Notify me when stock level reaches' input field, and a '3' next to the 'Allow purchase when stock level is zero' toggle switch.

Inventory settings

Allowing purchases when stock level reaches zero

If you toggle Allow purchase when stock level is zero you should ensure that you can fulfill the order
