

Shipping Options

When a customer purchases an item from your store, you can offer them multiple shipping options.

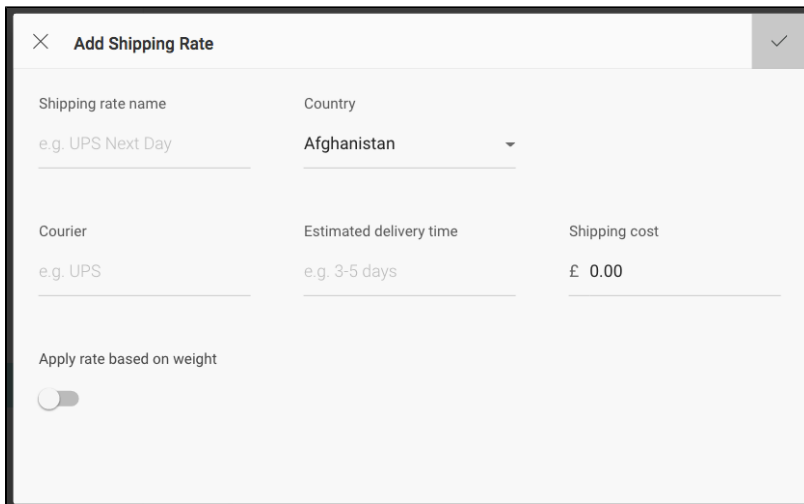

To add a shipping option:

1. On the Store settings page, click the Shipping tab
2. Click the Add Shipping Rate button

Add shipping rate

This button will show the settings for Name, Destination, Courier, Estimated delivery time and Shipping cost.

A screenshot of the 'Add Shipping Rate' form. The form has a title bar with a close button (X) and a checkmark button. It contains several input fields: 'Shipping rate name' with the example 'e.g. UPS Next Day', 'Country' with a dropdown menu showing 'Afghanistan', 'Courier' with the example 'e.g. UPS', 'Estimated delivery time' with the example 'e.g. 3-5 days', and 'Shipping cost' with the example '£ 0.00'. At the bottom, there is a toggle switch for 'Apply rate based on weight' which is currently turned off.

Shipping rate options

Applying rate based on weight

If the cost of shipping varies by weight, toggle Apply rate based on weight

Weight units

The default unit for weight is grams. This can be changed to kilograms, pounds or ounces. Go to Store settings and select the Currency & Formats tab.
