

How To Push Services To A New Account

To push one (or more) service(s) to a new account within CHI, first log into your CHI account. (<https://chi.uk2.net>)

In your CHI account, select the "Account" icon near the bottom left of your browser.

This will bring up a list of all your current account services. To move one or more service to a new account, select the service(s) you want placed within the new account by checking the box next to the service(s). Then click on the Action button near the top of the page, and select the "Push To New Account" option.

You will be prompted to create the new account by entering a username and password.

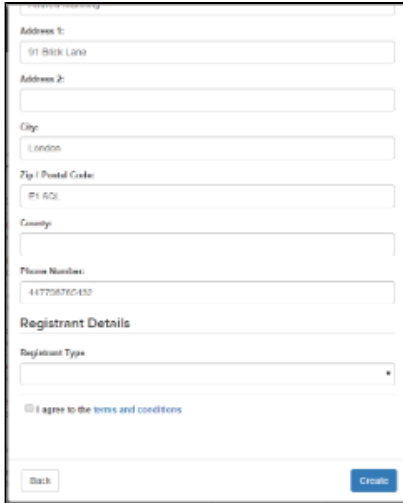

Create Customer Account

Username:

Password:

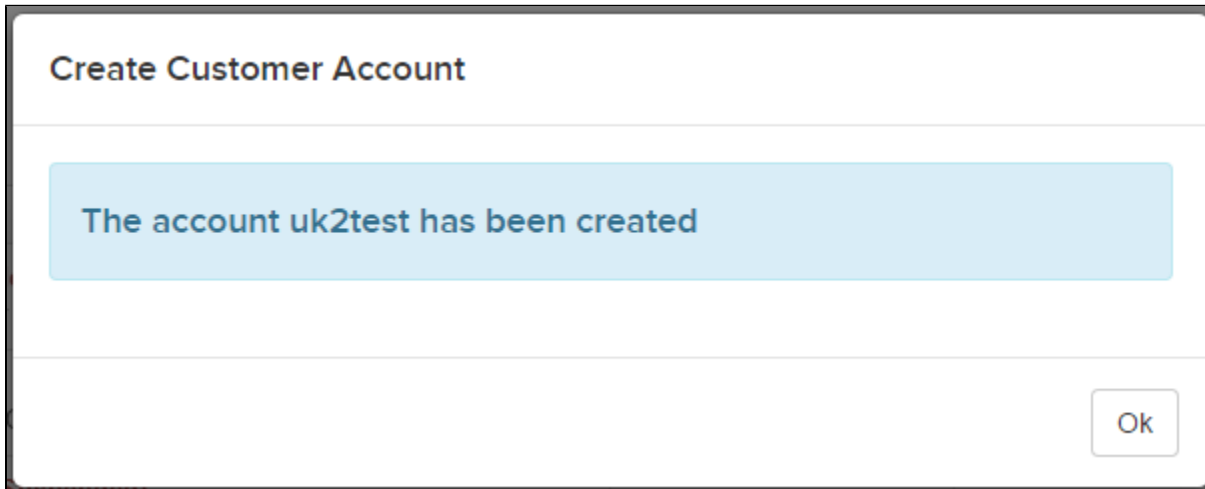

Repeat Password:

Once you click on "Next" you will be directed to enter the Customer Account details.

A screenshot of a web form for creating a customer account. The form is titled "Create Customer Account" and contains several input fields: "Address 1" (with "91 BARK Lane" entered), "Address 2", "City" (with "London" entered), "Zip / Postal Code", "Phone Number" (with "447758765432" entered), and "Registrant Details". Under "Registrant Details", there is a dropdown menu for "Registrant Type" and a checkbox for "I agree to the terms and conditions". At the bottom, there are "Back" and "Create" buttons.

After providing the details for the new account you can click on the "Create" button. The new account will then be created, and the services will be listed within the newly created account.

You can now log in to the newly created account to access and approve any services that have been pushed to the new account.
